Allowing 30 Yards to a Set. \$5.98
The Set

Because of the immense volume of regular work we have had on hand this spring we have not been able to make a special offer for many weeks. This announcement will, therefore, excite more than ordinary interest.

For any ordinary size 5-piece set of furniture we will make slip covers, allowing 30 yards of material to a set, and permitting choice from our entire line of Belgian cotton damasks, consisting of linen color grounds, some entirely plain, others with pin stripes of green, blue and red; still others with broader stripes, and some in artistic fleur de lis designs. The amount of material allowed in this offer is sufficiently liberal for almost any size 5-piece set. The workmanship is precisely the same, and done by the same expert makers who do our regular high-class work.

The Paige—and Public Demand

In Three Years, Paige Sales Have Increased
From \$44,000 to more than \$1,250,000 a Month

These astounding figures are indisputable evidence of Paige supremacy in the medium price field.

They indicate an increasing demand for Paige cars that is without parallel in the middle division of the Automobile Industry. They affirm plainly and clearly that the Paige is a "preferred" investment with the motor buying public—the "first choice" of men who weigh motor car values.

As you turn these figures over in your mind, remember that increased sales can only come as a result of increased demand. The public does the buying—the public alone determines whether automobile sales shall increase or decrease.

So—above all—these figures mean that the motor public has rendered an overwhelming verdict in favor of the Paige. In the most substantially convincing way—by an investment of over \$1,250,000 a month—Motor Car buyers have selected the Paige as the best value of the medium priced field.

With the facts before you—in the face of such sweeping evidence—can you afford to purchase any car until you have carefully investigated the Paige? Isn't it logical to assume that there is a tangible, practical reason back of this marked preference for one car.

See the Paige today. The answer is in the car itself.
